

SELF-CONSOLIDATING CONCRETE

Course Overview

This presentation runs 60 minutes. The topic is Self-Consolidating Concrete and how its 8000-PSI strength and exceptionally smooth finish lends itself to a diverse range of opportunities for architects and engineers. Our relationship with The Department of Defense, Department of Energy, WSDOT, and others has forged Wilbert into an extremely diverse precaster. The purpose of the lunch and learn is to provide an open forum whereby architects and designers can entertain the possibility of designing **new** architectural and structural products with a premium concrete. Our capabilities as a precaster facilitate the potential of producing greener, stronger, longer-lasting, more diverse and aesthetically pleasing designs.

Outline

- I. **2-minute video of our company**
- II. **2-minute video on Self-Consolidating Concrete**
- III. **Photo Library and discussion of unorthodox products and how they apply to designing and engineering**
- IV. **Questions and conceptual applications**
